

VDOM License Registration

Virtual Domains (VDOM) enable your FortiGate unit to split its resources and function as multiple independent units with common administration. A separate VDOM license is required.

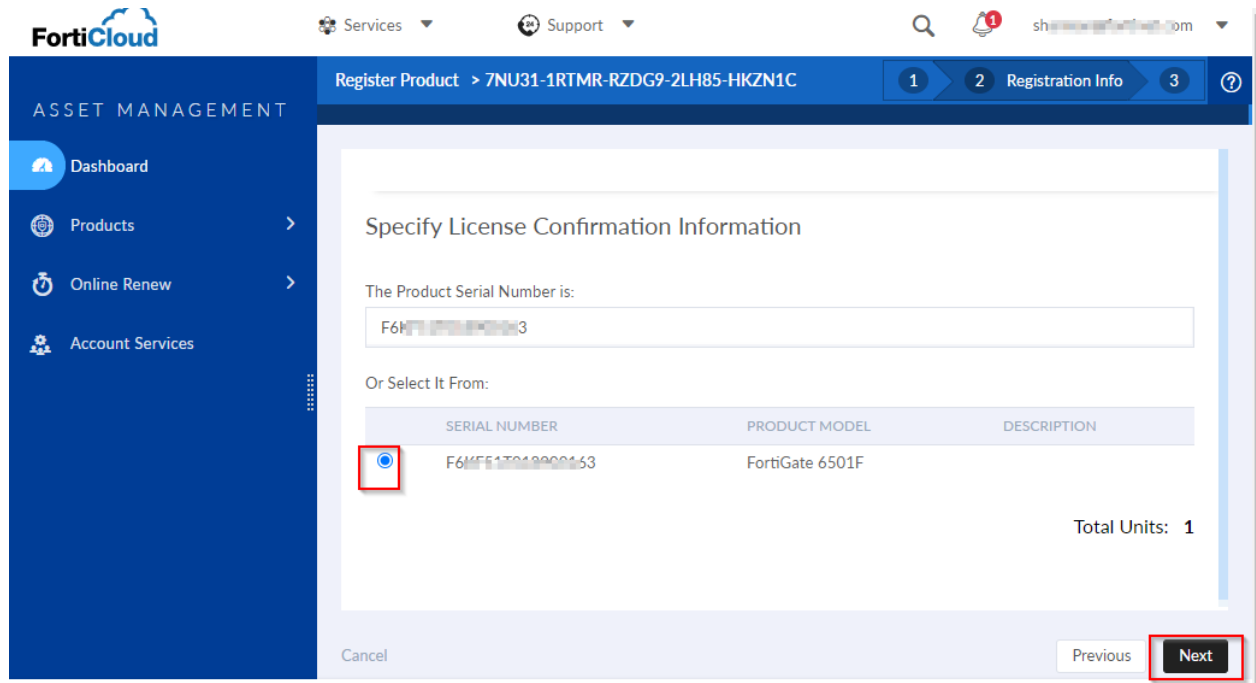

1. Login to <https://support.fortinet.com> with your account ID/email and password

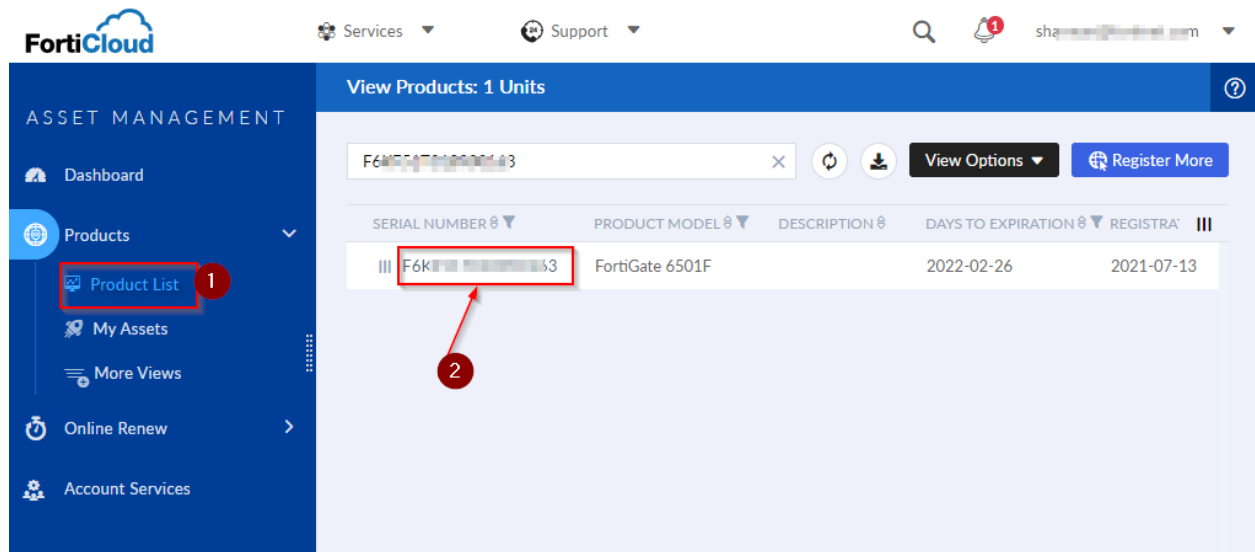

2. Enter the **registration code**, select the end user type and click on **Next**

3. Select the **serial number** of the device on which you want to apply the VDOM license and click on **Next**

4. Once the registration is done go to product list [PL1] and click on the serial number of the firewall on which you have applied the VDOM license

5. On the landing page, click on the **license key** under the License and Key section.

License & Key

License Type	License Number	Registration Date
VDOM Upgrade	VDCM-174-3072476	2018-04-18
Virtual Domain License Add 50		

Key	License Number	Description
Show License Key	VDCM-174-3072476	Virtual Domain License for 60

License Key

K3WGG-CGYT-QHNJB-N [PL2]

6. You are required to configure this **VDOM key** to your FortiGate in **GUI**.
